

XP1400

CLASSIC BLUEPRINT, MODERN DESIGN

Jetech pumps feature a reliable design, created to maximize performance, minimize down times and ease maintenance. Built to last, these resilient pumps boast carefully selected durable materials to ensure a longer service life, even in the toughest in-field working conditions. With interchangeable components, Jetech pumps can be easily and quickly converted resulting in lower cost of ownership, fast turnaround times, use in a wide range of applications and dependability across pressure ranges. Jetech provides adept customer service to promote safety and guidance in incorporating our products into your fleet. Whether you are a manufacturer or a user with the drive to do it yourself, our team of experts will help you select the proper Jetech pump for your needs. Complete diesel and electric systems are available in addition to Jetech's state-of-the-art bare shaft unit.

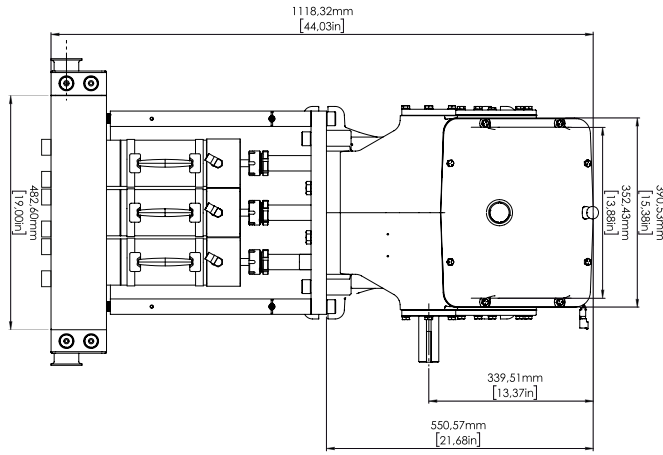

FEATURES & BENEFITS

- Capable of power input up to 113 HP (84 kW)
- Simple construction with few moving parts
- Single body valves with only one spring, resulting in 50% less failures
- Integrated gear reducer for smallest footprint possible
- No expensive conversion kits. The 40k head and one set of valves and cylinders delivers the full 20k to 40k psi pressure range. The 20k head delivers 20k psi and below
- Fastest and easiest maintenance of all waterjetting pumps on the market
- No special tools needed for field maintenance

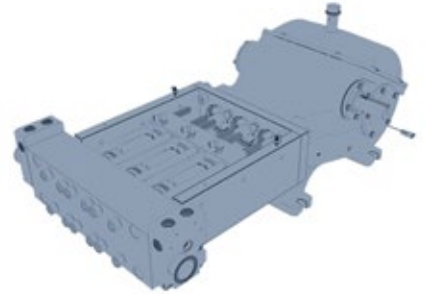

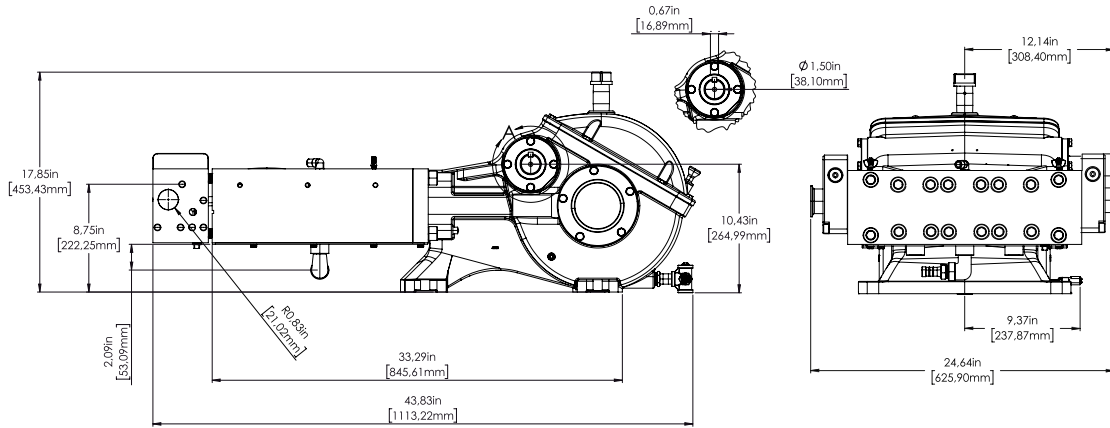

IT'S SIMPLE. IT BLASTS. IT LASTS.
