

Jetech is a global leader in **high and ultra-high-pressure pumping systems**, capable of reaching pressures up to 50,000 psi (3,500 bar). Founded by Jerry DeSantis in 1989, Jetech brings extensive expertise in **waterjetting** with a focus on **simplicity, reliability, and innovation**. As part of the **Peroni Pompe Group** since 2023, Jetech is now able to serve customers globally with even greater reach and support.

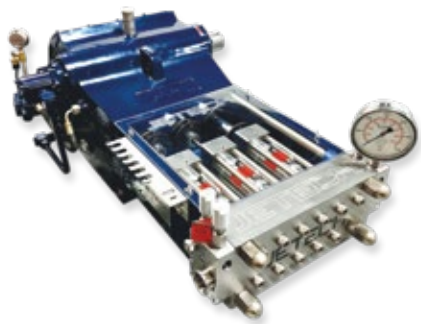

PRODUCTS

Jetech's core offering centers on its proprietary **AD (Advanced Design) liquid end**, renowned for its **innovation, simplicity, and reliability** at ultra-high-pressures. This liquid end is available across Jetech's complete product line of **bare shaft pumps** and **waterjetting units**.

As a **one-stop shop for waterjetting**, Jetech offers both signature and third-party **waterjetting tools**, both **manual and automated**. Additionally, Jetech provides a unique open-frame **subsea pump**, capable of operating at unlimited ocean depths, delivering pressures up to 50,000 psi.

SUBSEA PUMPS

IT'S SIMPLE. IT BLASTS. IT LASTS.

APPLICATIONS

Jetech offers comprehensive waterjetting solutions for a wide range of applications. For **surface preparation**, Jetech's systems effectively remove coatings, rust, and contaminants without damaging underlying materials. In **heat exchanger** cleaning, Jetech automated solutions and tools ensure efficient removal of scale and debris. 3D, engineered **vessel cleaning** solutions tackle tough residues in confined spaces, while **hydrodemolition**

packages are used to break concrete without damaging structural elements. For **abrasive cutting**, Jetech combines high-pressure water with abrasives for precise material cutting. For **aquaculture**, Jetech offers containerized units for net cleaning, ensuring clean fish farming environments. Finally, Jetech's unique subsea pump supports **intervention work**, such as pipeline pressure and leak testing.
